SHIVSHANKAR GAWALI

Pune, Maharashtra, India

Professional Summary

DevOps Fresher with hands-on experience in AWS cloud infrastructure, CI/CD pipelines (GitHub Actions, Jenkins), Docker, Terraform, Kubernetes, and Python scripting for automation and monitoring. Experienced in deploying cloud-native applications, troubleshooting AWS services, and automating infrastructure using IaC. Strong understanding of SDLC, cloud security basics, and DevOps best practices.

Education

- **MCA |** Savitribai Phule Pune University (SPPU), Pune | 2023-25 | CGPA: 7.35
- **BCA |** Swami Ramanand Teerth Marathwada University (SRTMUN) | 2021 | CGPA: 8.88

Projects

Cloud-Native Application Deployment on AWS ECS (Fargate)

- Dockerized a **PHP–MySQL** web application and pushed container images to **Amazon ECR**.
- Built and automated a CI/CD pipeline using GitHub Actions to streamline application deployment to AWS ECS (Fargate).
- Deployed the application on **AWS ECS (Fargate)** behind an Application Load Balancer for scalability and high availability.
- Integrated Amazon RDS as the backend database and configured secure connectivity using IAM roles and security groups.
- Troubleshot **container startup issues, ALB health check failures, and DB connection errors**
- Monitored application performance and logs using **Amazon CloudWatch.**

Tools Used: AWS, GitHub Actions, Docker, Git, GitHub, Linux, MySQL

- **GitHub:** https://github.com/gawalishankar/Fusion_Project.git

AWS 3-Tier Cloud Infrastructure using Terraform

- Designed and automated a production-style **3-tier AWS architecture** (Web, App, DB) using **Terraform (IaC).**
- Provisioned VPC with public and private subnets, configured **ALB + Auto Scaling Group** for high availability and scalability.
- Deployed **RDS PostgreSQL in private subnet** with least-privilege **security groups** to secure database access.
- Implemented **remote Terraform state (S3 + DynamoDB locking)** to enable safe collaboration and state management.
- Deployed **Nginx** on **EC2** using user-data for automated server bootstrapping.

Tools Used: AWS, Terraform, Nginx, Linux, Git

- **GitHub:** https://github.com/gawalishankar/aws-3tier-terraform.git

Skills

- **Cloud Platforms:** AWS (EC2, ECS, ECR, Lambda, RDS, IAM, VPC, ALB)
- **CI/CD Tools:** Jenkins, GitHub Actions
- **Version Control & Config:** Git/GitHub, YAML
- **Containers & Orchestration:** Docker, Kubernetes
- **Infrastructure as Code:** Terraform
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch
- **Scripting & OS:** Linux, Bash, Shell Scripting, Python
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, Ports & Firewalls, OSI model

Certifications

- **DevOps with AWS –** Skill Ridge
- **AWS Certified Cloud Practitioner –** AWS
