

SHIVSHANKAR GAWALI

Pune, Maharashtra, India

+91 7038499894 | gawalisa201@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience designing, automating, and deploying cloud-native applications on AWS. Proficient in Infrastructure as Code using Terraform, containerization with Docker, orchestration using Kubernetes (K8s, K3s), and CI/CD automation using GitHub Actions and Jenkins. Experienced with Linux administration, AWS networking, monitoring using Prometheus, Grafana, and CloudWatch, and implementing scalable, highly available cloud infrastructure. Passionate about automation, cloud technologies, and DevOps best practices.

EDUCATION

- **MCA** | Savitribai Phule Pune University (SPPU), Pune | 2023-25 | CGPA: 7.35
- **BCA** | Swami Ramanand Teerth Marathwada University (SRTMUN) | 2021 | CGPA: 8.88

EXPERIENCE

DevOps Intern

Feb 2026 -Present

TejTatv InnoTech Private Limited — Pune, India

- Maintaining development and deployment environments for the p-MATRIQS platform.
- Containerized backend services using Docker, improving deployment consistency across environments
- Developed and maintained GitHub Actions CI/CD pipelines, reducing manual deployment effort by approximately 70%.
- Supported AWS infrastructure provisioning including EC2, IAM, Security Groups, VPC, and networking.
- Performed Linux administration including service management, user management, log analysis, and troubleshooting.
- Maintained deployment documentation, runbooks, and configuration records for operational processes.
- Implemented monitoring and logging practices to improve application observability.
- Collaborated with development and QA teams to ensure reliable production deployments.

PROJECTS

Cloud-Native Application Deployment on AWS ECS and Kubernetes

- Containerized a PHP-MySQL web application and pushed container images to Amazon ECR.
- Designed CI/CD pipelines using GitHub Actions to automate application deployment to AWS ECS (Fargate).
- Deployed the application on AWS ECS (Fargate) behind an Application Load Balancer for scalability and high availability.
- Also deployed the same application locally using Kubernetes cluster on Minikube to practice container orchestration concepts.
- Created Kubernetes Deployments and Services to manage container lifecycle and expose services.
- Integrated Amazon RDS as the backend database and configured secure connectivity using IAM roles and security groups.
- Troubleshooted container startup issues, ALB health check failures, and DB connection errors.
- Monitored application performance and logs using Amazon CloudWatch.

Technologies Used

AWS ECS (Fargate), Amazon ECR, Amazon RDS, IAM, VPC, ALB, Security Groups, CloudWatch, Docker, Kubernetes (Minikube), GitHub Actions, Git, GitHub, Linux, PHP, MySQL, YAML

AWS 3-Tier Cloud Infrastructure using Terraform

- Designed and provisioned a production-style 3-tier AWS architecture (Web, App, DB) using Terraform Infrastructure as Code.
- Provisioned VPC with public and private subnets to isolate web, application, and database layers.
- Configured an Application Load Balancer (ALB) in public subnets to distribute traffic across EC2 instances.
- Implemented Auto Scaling Group with EC2 instances running Nginx to ensure high availability and scalability.
- Deployed RDS PostgreSQL in private subnet with least-privilege security groups to secure database access.
- Implemented remote Terraform state (S3 + DynamoDB locking) to enable safe collaboration and state management.
- Automated EC2 instance configuration using user-data scripts to bootstrap Nginx during instance launch.

Technologies Used:

Terraform, AWS (EC2, VPC, Public & Private Subnets, Internet Gateway, NAT Gateway, Route Tables, Security Groups, ALB, Auto Scaling Group, Launch Template, RDS PostgreSQL, IAM, S3, DynamoDB), Linux, Nginx, Git, GitHub

- **GitHub Repository::** <https://github.com/gawalishankar/aws-3tier-terraform.git>

SKILLS

- **Cloud Platforms:** AWS (EC2, ECS (Fargate), ECR, VPC, IAM, ALB, Auto Scaling, RDS, CloudWatch, Route 53)
- **Infrastructure as Code:** Terraform
- **Containers & Orchestration:** Docker, Kubernetes
- **CI/CD:** Jenkins, GitHub Actions
- **Version Control:** Git, GitHub
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch
- **Scripting:** Bash, Shell Scripting, Python
- **Operating Systems:** Linux (Ubuntu)
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, VPC, Subnets, Route Tables, NAT Gateway, Load Balancing, Security Groups

CERTIFICATIONS

- **DevOps with AWS** – Skill Ridge
- **AWS Certified Cloud Practitioner** – AWS
